

One-Day-Workflow

From amplification to results in 24h

Amplicon generation

NGSgo®-MX6-1 offers multiplexed amplification primers for HLA-A, B, C, DRB1, DQB1, DPB1

GenDx-LongMix PCR mastermix minimizes pipetting steps

Library preparation

NGSgo®-IndX plates include premixed indices and can be used for any number of samples, up to 384

Data analysis

NGSignition automatically starts analyzing your sequencing without user intervention

Results

NGSEngine® delivers your typing results with the highest accuracy in the fastest manner

Contact us about introducing the One-Day-Workflow in your lab

Based on 10 samples tested with NGSgo®-MX6-1 in combination with Illumina nano flow cell (2x150 bp)

personalizing diagnostics
